## **Everyday Extended Events**

### Jes Borland Sr SQL Engineer, Concurrency

### **Reminder:** Intersect with Speakers and Attendees

- Tweet tips and tricks that you learn and follow tweets posted by your peers!
  - Follow: #SQLintersection and/or #DEVintersection
- Join us Thursday Evening for SQLafterDark
  - Doors open at 7:30 pm
  - Trivia game starts at 8:00 pm Winning team receives something fun!
  - Raffle at the end of the night Lots of great items to win including a seat in a SQLskills Immersion Event!
  - The first round of drinks is sponsored by SQL Sentry and SQLskills

### **Overview of Extended Events**

#### **Events**

#### A single thing or happening that occurs

#### Examples:

- file\_read\_completed
- file\_write\_completed
- sql\_statement\_starting
- sql\_statement\_completed
- degree\_of\_parallelism
- page\_compression\_attempt\_failed

#### Number of Events

### **Fields**

#### Information about the event

#### Event

- database\_id
- file\_id
- duration
- size

#### Global

- client\_hostname
- query\_plan\_hash
- session\_id
- sql\_text

#### **Predicates**

- The WHERE clause
- Set on Event or Global field
- Common equality operators such as =, >, <</p>
- Some that use state of the operator
  - greater\_than\_max\_int64
    - Maintains the maximum value of the field passed to it
    - Only fires when it encounters a value that is greater than the current maximum
    - Sets a new maximum
    - Repeat

# The power of Extended Events: Pre-processing

http://blogs.msdn.com/b/extended\_events/archive/2010/06/24/today-s-subject-predicates.aspx

# Measuring "Observer Overhead" of SQL Trace vs. Extended Events

Test	Avg Requests/sec	BatchDuration h:mm:ss
Baseline	2345	00:13:35
Trace file	1920	00:16:40
Profiler local	215	02:29:00
Profiler remote	260	02:03:20
Extended Events event_file	2102	00:15:15
Extended Events ring_buffer	2073	00:15:40
Extended Events streaming	1546	00:16:35

http://sqlperformance.com/2012/10/sql-trace/observer-overhead-trace-extended-events

### **Targets**

Where do you want to save data?

Target	Memory	File	OS	Sync	Async
<b>Event Counter</b>	X			X	
<b>Event File</b>		X			X
<b>Event Pairing</b>	X				X
ETW			X	X	
Histogram	X				X
Ring buffer	X				X

#### **Sessions**

- Add all this together, you have a session
- View currently running sessions with sys.dm\_xe\_sessions

### **Creating sessions**

- Use "New Session..." (not the Wizard)
- Script to T-SQL so you understand the format

### Viewing output

- Use the UI!
- Grouping & aggregation
- Filtering
- Save view
- ...or learn and use XQuery

#### **Built-in sessions**

#### system\_health

- Error severity >= 20
- Memory errors
- Non-yielding scheduler errors
- Deadlocks
- □ Latch waits > 15 seconds
- Lock waits > 30 seconds
- Long preemptive waits
- CLR allocation & virtual allocation failures
- □ ...and more

#### AlwaysOn\_health

- availability\_replica\_state\_change
- availability\_group\_lease\_expired
- availability\_replica\_automatic\_failov er\_validation
- error\_reported (multiple error numbers): for transport or connection issues
- data\_movement\_suspend\_resume
- alwayson\_ddl\_executed
- availability\_replica\_manager\_state
- error\_reported (1480): DatabaseReplica Role Change

### **My Top Sessions**

### Capture queries and resources

- Purpose: capture query activity
- Show:
  - □ UI
    - Aggregation
  - □ Filter
  - Targets:
    - Ring buffer
    - Event File

### Capture stored procedure parameters

- Purpose: capture what parameters were used when a stored procedure was executed
- Show:
  - □ UI parameters

### Track I/O for database files

#### Show:

- Targets
  - Event Counter
  - Histogram
    - Event: file\_read\_completed
    - Base buckets on: Field file\_id

### Capture index page splits for detecting fragmentation

#### Show:

- Target
  - Event File
  - Querying to get more info

### 15 Second I/O Errors

#### Alert + Job + Session

- Alert on error 833
- Job to start XE session
- □ Session to capture query for reads > 15 seconds and writes > 15 seconds

### Capture deadlock graphs

- View Target Data
  - The Deadlock tab is sneaky!

### **Help the Community**

### **A GitHub Repository**

github.com/grrlgeek/extended-events

### Questions?

jborland@concurrency.com @grrl\_geek blogs.lessthandot.com concurrency.com/blog

### Don't forget to complete an online evaluation!

### **Everyday Extended Events**

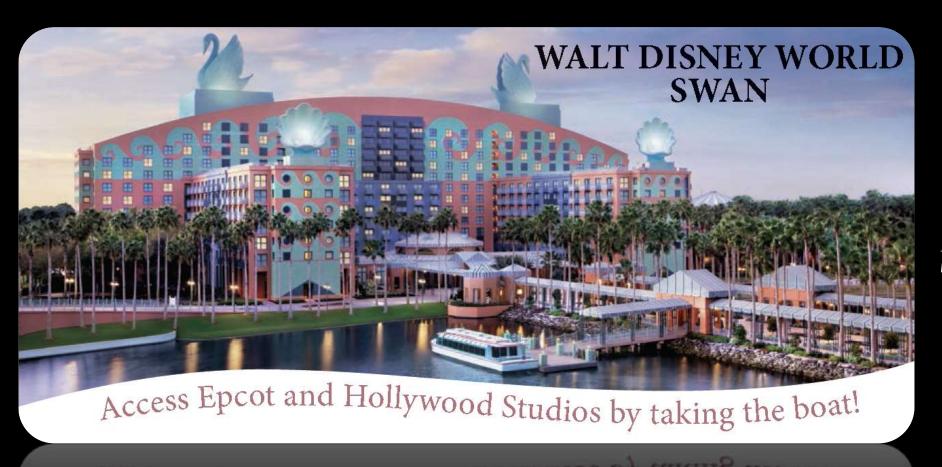

Your evaluation helps organizers build better conferences and helps speakers improve their sessions.

Thank you!

May 21-24
We're back in Orlando!

Leave the every day behind and enter a world of wonder and enchantment at the Walt Disney World® Resort.

Located in the heart of the most magical place on earth, the Walt Disney World Swan and Dolphin Resort provides a truly extraordinary backdrop for our event! Beautiful tropical landscaping, tranquil waterways and classic art and architecture work together to create a stunning landmark!
